NOW I LOOK
LIKE I FEEL INSIDE.

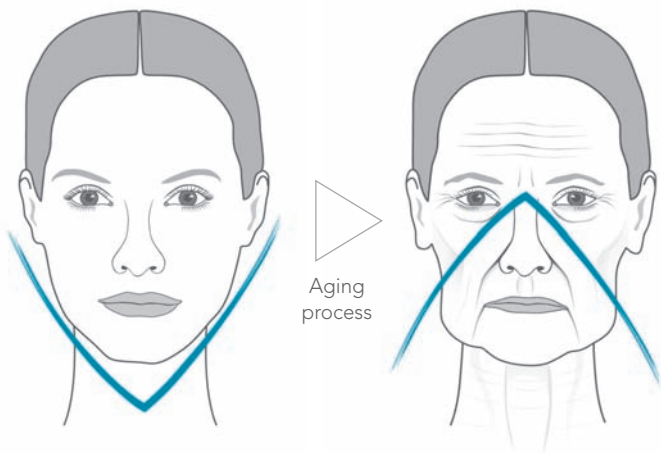

MERZ AESTHETICS™

Collagen and the natural aging process.

An abundance of healthy collagen is what gives skin a smooth, supple, youthful appearance. As you age, natural collagen breaks down, resulting in skin laxity, wrinkles and loss of facial volume which can make your skin look and feel old.

Youthful appearance:
Optimal volume distribution

A sign of the times:
Increased volume shift

The best way to refresh your appearance is by replenishing the volume your skin has lost. This diminishes wrinkles, resulting in a much more youthful look. Radiesse Volumizing Filler is an ideal choice. In addition to providing immediate volume correction, it also stimulates production of your own natural collagen - something that no other filler does!¹ The result is immediate and lasts a year in many patients.^{2,3}

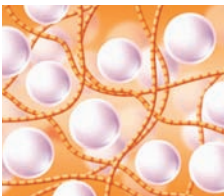

Immediate results, increased collagen production.

How it works:

RADIESSE Volumizing Filler immediately provides the lift needed to diminish signs of aging because of the incredible lifting capacity of the product that comprises calcium-based microspheres and gel. What makes RADIESSE Volumizing Filler truly unique is its ability to act like a scaffold under the skin, providing structure and lift and stimulating your own natural collagen to grow. This natural collagen growth continues for several months,¹ which extends the initial effect of RADIESSE Volumizing Filler. In many patients, correction lasts for a year or more, so choose RADIESSE Volumizing Filler for long-lasting, natural, and youthful results.^{2,3}

The calcium-based microspheres suspended in gel works instantly, resulting in an immediate correction.

After injection, the new collagen tissue is stimulated to produce naturally.¹

Over time, the gel is absorbed and the calcium-based microspheres are metabolized by the body, leaving behind your own, natural collagen.¹

Refresh key areas with RADIESSE Volumizing Filler.

Targeting the areas below with RADIESSE Volumizing Filler helps lead to a more youthful looking you. See examples on the next panel showing how RADIESSE Volumizing Filler refreshes the appearance of actual patients in these key areas.

Real patients. Real results.
Real satisfaction.

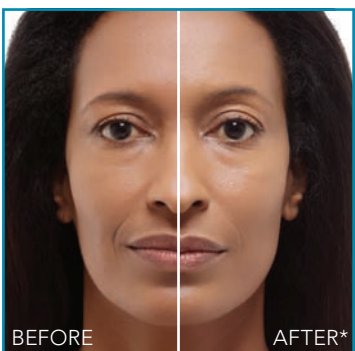

"It doesn't change the way I look, it just enhances it."

Zetta. Age 51.

"I love the results, my husband loves the results. He's complimenting me every day!"

Damaris. Age 52.
Patient featured to the right.

"It's an invisible, beautiful result. I love it."

Blaine. Age 49.

*Individual results may vary.

RADIESSE[®]

VOLUMIZING FILLER

The RADIESSE Difference.

- The only filler to both immediately replenish lost volume and stimulate the production of your own natural collagen.¹
- Clinically proven to last a year or more in many patients.^{2,3}

With just one treatment of RADIESSE Volumizing Filler wrinkles and folds may disappear.*

Immediately. Subtly. And because RADIESSE Volumizing Filler naturally stimulates your body's own collagen, your skin looks even better over time.¹

IMPORTANT RADIESSE[®] VOLUMIZING FILLER TREATMENT CONSIDERATIONS

RADIESSE Volumizing Filler is indicated for subdermal implantation for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds and the rejuvenation of the hand. After injection, patients may experience redness, bruising, swelling or other local side effects. Most side effects of treatment resolve within a few days. More rare side effects may include swelling that lasts longer, unevenness or firmness in the area injected, and as with any injection, there may be a risk of infection.

Please see instructions for use for full list of warnings and precautions.
